MUHAMMAD SHAKAIB

FULL STACK SOFTWARE ENGINEER • PHP / LARAVEL • C# / .NET CORE • REACT.JS / ANGULAR

Karachi, Pakistan | +923352792032 | mohammadshakaib96@gmail.com | linkedin.com/in/muhammad-shakaib | muhammadshakaib.com

PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with 6+ years of experience building scalable, high-performing enterprise applications used by millions of users. Proficient across PHP/Laravel and actively expanding into C#/.NET Core, with hands-on production experience in both stacks. Proven track record in REST API design, React.js & Angular frontend development, CI/CD pipelines and Agile delivery. Led a team of 10 engineers for 18+ months and delivered solutions for international clients across New Zealand, Canada, and the USA.

TECHNICAL SKILLS

Languages	PHP, C#, JavaScript, SQL
Frameworks	Laravel 8 & 9, .NET Core / ASP.NET Core, React.js, Angular, Entity Framework Core
Frontend	React.js, Angular, JavaScript (ES6+), Bootstrap, jQuery, Blade, ARIA / WCAG accessibility
Databases	MySQL, SQL Server, query optimisation, indexing, schema design, Redis caching
Cloud & infra	AWS, Docker, Nginx, Apache, Ubuntu Linux
CI/CD & DevOps	GitHub Actions, GitHub, Jira, CI/CD pipelines, Git branching strategies
Architecture	REST APIs, Multi-Tenancy, MVC, Repository Pattern, Event-Driven, Queues & Background Jobs
Integrations	Stripe, PayPal, CyberSource, Twilio, SendGrid, OneSignal, Google APIs, Facebook APIs
Process	Agile / Scrum, Sprint Planning, Code Reviews, Technical Mentorship, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Software Developer - Contour Software
May 2024 – Present

Karachi, Pakistan

- Build and maintain enterprise .NET Core applications covering REST APIs, authentication workflows, admin dashboards built on Angular, and backend services serving large user bases.
- Resolve high-priority production issues through systematic root-cause analysis and code refactoring, reducing recurring defects by ~30% and improving system reliability.
- Implement accessibility improvements adhering to WCAG standards using JavaScript, Bootstrap, and ARIA, improving usability across diverse user groups.
- Optimise database queries, API endpoints, and caching strategies, achieving measurable reductions in page load times (~15%) for high-traffic enterprise deployments.
- Champion best practices within Agile teams: code reviews, branching strategies, and peer knowledge-sharing sessions.

LLM PHP/JS Developer - Turing
Nov 2024 – Mar 2025

Remote

- Engineered and fine-tuned large language models using SFT, RLHF and developing deep insight into AI-driven product development and data-driven reasoning systems.
- Designed complex multi-step task flows and scenario-based datasets to improve real-world model reasoning and decision-making, collaborating with cross-functional AI experts globally.

Senior Software Engineer - Cooperative Computing
Apr 2021 – May 2024

Karachi, Pakistan | Promoted from Associate Software Engineer and Software Engineer

- Led a team of 10 software engineers for 18+ months, sprint planning, code reviews, task allocation, technical mentorship, and direct communication with international stakeholders.
- Designed and delivered full-stack features across Laravel (PHP) and .NET Core (C#) platforms, including e-commerce flows, payment gateway integrations (Stripe, PayPal, Cybersource), and enterprise dashboards.
- Architected multi-tenant enterprise solutions using EF Core Query Filters and custom Middleware, enabling centralised management of multiple client environments.
- Executed migration of 1M+ records with zero data loss and full business continuity, leveraging robust validation and rollback procedures.
- Improved application performance by ~20% through Redis caching, query optimisation, and API refactoring directly improving user experience for high-traffic platforms.
- Built React.js frontends for enterprise loyalty platforms and data-driven research tools serving Dubai-based audiences.

Software Engineer - Cybarea Pvt. Ltd.

Dec 2019 – Mar 2021

Karachi, Pakistan

- Converted 30+ legacy SOAP endpoints to RESTful APIs, modernising system integrations and improving reliability and developer experience.
- Built 3 automation modules for DIDX.Net that increased telecom sales team operational efficiency by ~40%.
- Implemented CRON jobs, background workers, API security layers, and SQL query optimisations to improve scalability and reduce operational overhead.

KEY PROJECTS

CampSite - Camp Management Platform, USA (campmanagement.com)

Core PHP · .NET Core · Angular · MySQL · SQL Server · REST APIs

- Contribute to the development and ongoing enhancement of CampSite, a fully automated SaaS camp management platform serving day camps and overnight camps across North America.
- Platform features include online registration, parent dashboards, activity scheduling, bunking boards, staff & medical management, transportation tracking, billing & financials, and a camp shop.
- Developed backend services and REST APIs powering myCAMPapp, CampSite's companion mobile application available on iOS and Android, built on a .NET Core backend with an Angular admin portal.
- Supported full website integration workflows and secure payment processing within the platform's billing and financial modules.

Comvita - E-Commerce Platform, New Zealand (comvita.com)

Laravel · PHP · JavaScript · MySQL · Stripe · PayPal · CyberSource

- Progressed from developer to Project Lead, managing a 10-person team building and scaling a full e-commerce platform for a major NZ brand: product pages, checkout, payment, and order management.
- Integrated Stripe, PayPal, and CyberSource payment gateways with 3D Secure, serving international customers across multiple currencies.

Enterprise Multi-Tenant SaaS Platform

.NET Core · EF Core · C# · SQL Server

- Architected multi-tenant SaaS infrastructure using EF Core Global Query Filters and Middleware for complete tenant isolation, adopted across multiple international enterprise clients.

Royal Management System

React.js · JavaScript · Ruby on Rails

- Delivered React.js frontend features for a global enterprise loyalty platform serving top-tier fashion brands, collaborating with backend teams on API integration and performance.

Royal York Property Management - Performance Optimisation (royalyorkpropertymanagement.ca)

WordPress

- Improved platform response times by 20% for a major Canadian property management company through Redis caching, query tuning, and API optimisation.

DIDX.Net - Telecom Automation Platform, USA (didx.net)

PHP · JavaScript · MySQL

- Built 3 automation modules eliminating manual sales workflows for a Delaware-based telecom platform, improving team efficiency by 40%.

EDUCATION

Bachelor of Science in Computer Science, 2019 — Sir Syed University of Engineering and Technology, Karachi, Pakistan

KEY ACHIEVEMENTS

- Led a 10-engineer team for 18+ months across full Agile SDLC, delivery, code quality, mentorship, and client communication.
- Migrated 1M+ records across enterprise systems with zero data loss and no unplanned downtime.
- Delivered ~20-30% performance improvements across multiple platforms through caching, API tuning, and query optimisation.
- Automated high-volume telecom sales workflows, improving team operational efficiency by 40% at DIDX.Net.
- Built and scaled full-stack solutions for international clients across New Zealand, Canada, and the United States.
- Integrated secure payment solutions (Stripe, PayPal, CyberSource with 3D Secure) handling real-money transactions for global ecommerce platforms.
